

How we get our first users.

We go live in **Barcelona.**

01	Trainers and influencers they post, their people join	20% OF WHAT THOSE PEOPLE PAY US
02	TikTok and Instagram our own account, and the trainers' own posts	€0 PER VIEW
03	The gym floor 733,000 gym members in Barcelona — and we train there too	€0 PER CONVERSATION

Nothing is paid before somebody pays us. Paid ads wait: an install still costs 2.6 to 6.7× what one is worth.

The first one has signed.

24,400 followers

20% of what they pay us

0% of what he sells himself

ACCEPTED

What **one coach** is worth.

500	of his followers join
€5,000	a month, at ten euros each
€1,000	to him
€4,000	to us

An example, not a result — five hundred is the number we are testing. And we take nothing from the courses he already sells.

Two ways in. One way to judge them.

The first **ninety days**.

WEEKS 1 – 4

Fix what the first three users showed us

an intro a beginner can finish, colour with a job, logging a day you missed — and 15 interviews with beginners in Barcelona

FIX

BEFORE WE SPEND

WEEKS 5 – 8

The trainers go live

Ali posts to his 24,400, we sign the next three, and our own TikTok and Instagram start

LIVE

THREE ROUTES RUNNING

WEEKS 9 – 12

Let the numbers pick the channel

cost per customer and retention, measured per route — the budget follows the one that works

DECIDE

CAC • RETENTION

Ninety days is enough to learn which route works. It is not enough to be big, and we are not pretending otherwise.

One subscriber, one month.

**Not a workout library. The coach in
your pocket.**

You bring the passion. We bring the plan.

Where that gets us.

IF ASKED

Who owns it today.

IF ASKED

Omar Alzori	Founder & CTO	1,200
