

Market study: who we serve, who we fight, and what one user costs.

Segmentation · TAM / SAM / SOM · competitors and prices · unit economics · why the category has no leader yet.

WHY A MARKET EXISTS

Most new members quit before month three. A coach fixes that. Almost nobody can afford one.

63%

of new gym members quit before month 3

Fewer than 4% are still going after a year. One in three members leaves every year.

54%

of beginners do not know where to start

Half say the weights area intimidates them.

€35-40 /h

for a personal trainer in Barcelona

Two sessions a week is €280+ a month. The gym itself averages €38.

The apps people already own log what happened. Nobody tells a beginner what to do next.

WHO WE SERVE FIRST

We segment by the **problem**, not by age.

● PRIMARY

Beginners who need direction

"I joined a gym, but I do not know what to do."

Program builder · goal setup · coach questions

● PRIMARY

People who start and stop

"I get motivated, then I lose the routine."

Streaks · daily goals · friends · rankings

● SECONDARY

Casual users juggling apps

"My workouts and my food are in different apps."

Training + fuel + coach in one

● SECONDARY

Motivated by competition

"I train more when friends join."

League · crews · step goals

● SECONDARY

Nutrition-first users

"I need an easier way to track food."

Meal photo · macros · hydration

● LATER

Experienced lifters

"I need precise programming and analysis."

Volume analytics · plan import

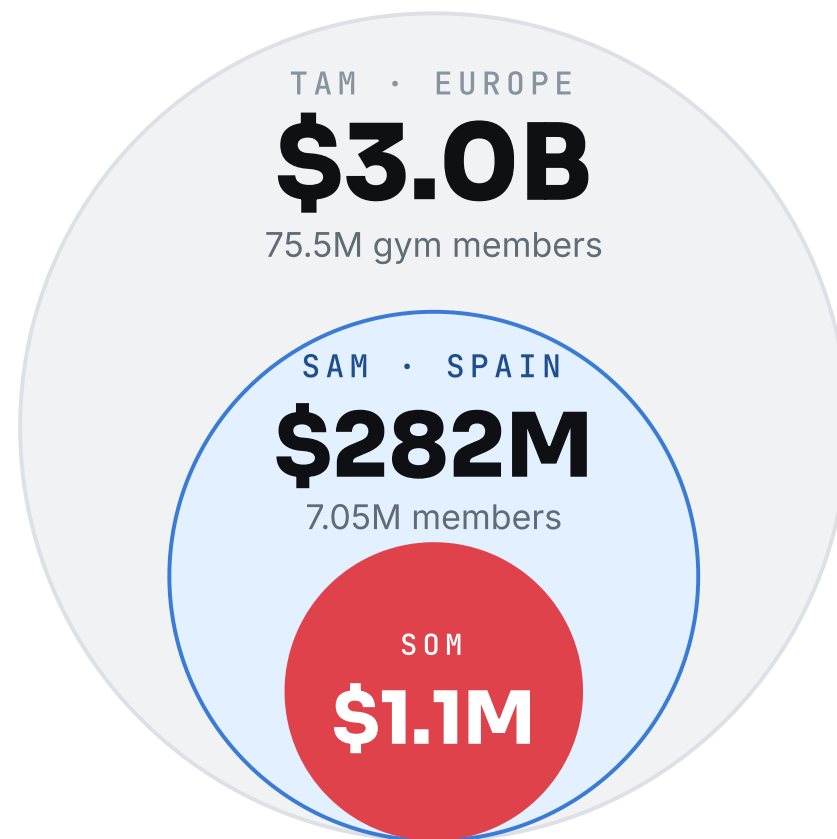

Alex, 23 · student in Barcelona · new gym member

"Give me a clear plan and help me keep following it." An illustrative persona. First test: 15 interviews in Barcelona.

TAM • SAM • SOM • BUILT FROM GYM MEMBERS, NOT FROM ANALYST HYPE

Europe is a **\$3 billion** market. Spain is our first **\$280 million**.

● TAM • EVERY GYM MEMBER IN EUROPE

\$3.0B / year

75.5M members × \$39.94 a year, the category median.
Top-down check agrees: Europe is 26% of the global app market.

● SAM • SPAIN

\$282M

7.05M members, 16.5% of adults. 39% are new every year: 2.75M beginners. Barcelona alone has 733k.

● SOM • WHAT WE WIN BY YEAR 3

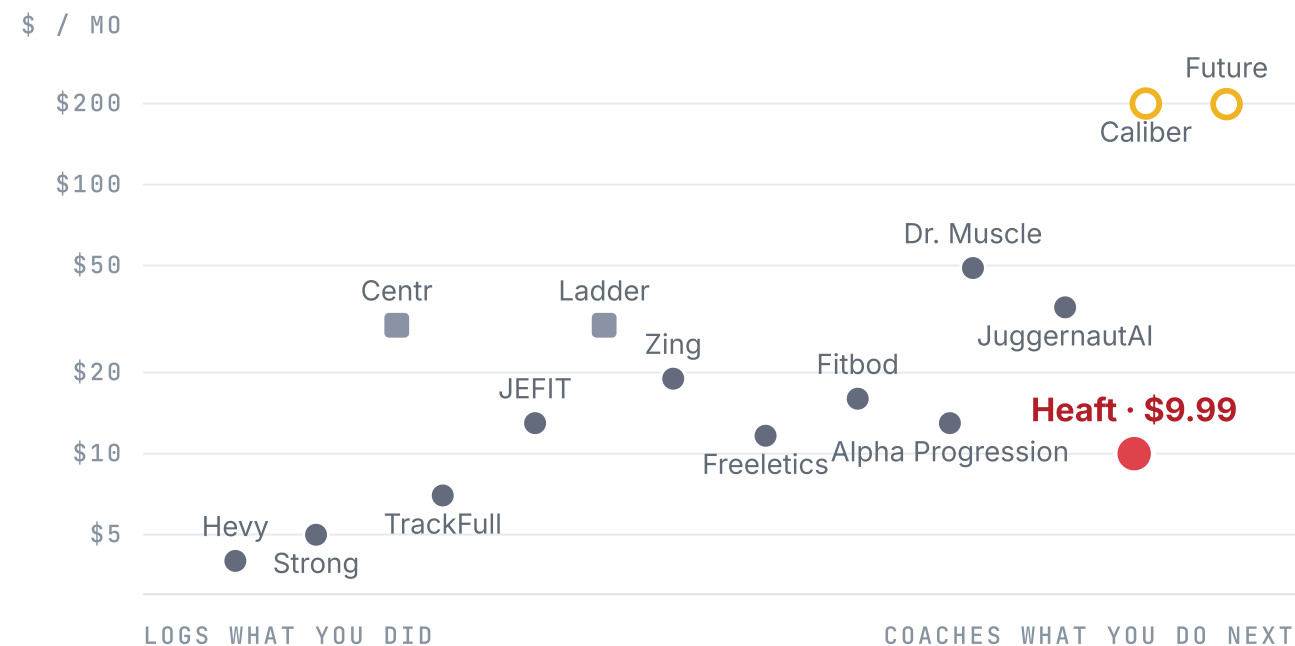

\$1.1M

1% of Spain's new joiners paying: 27,500 subscribers.

Sources EuropeActive / Deloitte EHFMR 2026 (75.5M, €39.1B, Spain 7.1M) • Deloitte / España Activa 2025 (7.053M members, 16.5%) • 2Playbook / Adecaff Barcelona 2025 • HFA 2025 Benchmarking (33.6% attrition + 5.5% growth = 39% new) • RevenueCat State of Subscription Apps 2026 (\$39.94, 2.9%) • Fortune Business Insights 2026 (\$12.27B, Europe 26%). Rings not to scale.

THE LANDSCAPE • PRICE VS HOW MUCH THE APP COACHES YOU

Cheap apps **log**. Apps that **coach** cost \$13 to \$200. The middle is empty.

● SOFTWARE • LOGGERS & GENERATORS

Hevy and Strong record sets for \$4. Fitbod, Alpha Progression and JuggernautAI generate workouts for \$13 to \$35. None of them talks back or feeds you.

■ CONTENT • VIDEO LIBRARIES

Centr and Ladder sell the same weekly programme to everyone. Not adapted to your lifts.

○ HUMANS • REAL TRAINERS IN AN APP

Future and Caliber coaching at \$199 to \$200 a month. A real coach, at a real coach's price. Future tried AI and shut it down in June 2026.

● HEAFT

Writes the week, runs the session, adapts next week, moves your food targets, answers questions. At the category's median price.

Prices US App Store listings read 15 Sep 2026; Freeletics shown as its 3-month Coach block ÷ 3. Position on the x-axis is our reading of each product's own marketing. Vertical axis is logarithmic.

WHAT THEY CHARGE • US APP STORE, 15 SEP 2026

We price at the median, **\$9.99**, and give more for it.

APP	FREE	MONTH	YEAR	WHAT THE "AI" REALLY IS	RATING
Hevy Barcelona · 16M users	Yes	\$3.99	\$23.99	NO AI logger + social feed	4.9
TrackFull	Yes	\$6.99	\$69.99	FEEDBACK comments on your log	—
Freeletics	Limited	\$11.66	\$79.99	GENERATOR weekly re-plan	4.6
Fitbod raised prices Aug 2026	Trial	\$15.99	\$95.99	GENERATOR no chat, no food	4.8
Zing Coach	Trial	\$18.99	\$59.99	QUIZ → TEMPLATE	4.8
JuggernautAI	Trial	\$34.99	\$349.99	RULES ENGINE powerlifting only	4.8
Future	No	\$199	—	HUMAN real trainer by message	4.9
Heaft	Yes	\$9.99	\$59.99	COACH writes, runs, adapts, feeds	—

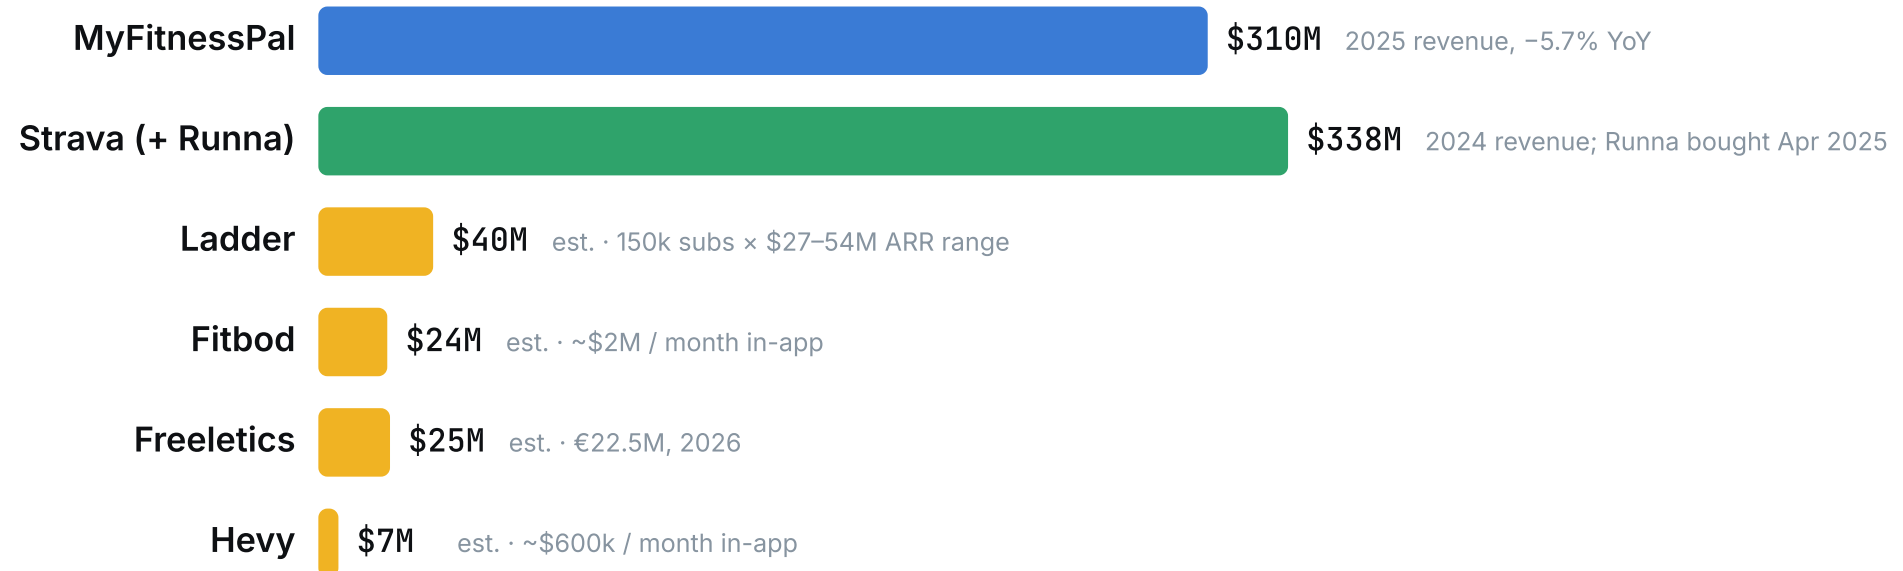

Category median: **\$9.99 / month** • **\$39.94 / year** • trial → paid **37.7%**

Sources Apple App Store US listings (15 Sep 2026) • Freeletics 3-month Coach \$34.99 ÷ 3 • Hevy and Fitbod user counts from their own sites • RevenueCat State of Subscription Apps 2026. Strong (\$4.99) is left out as a second logger; TrackFull has too few ratings to show one.

WHO ACTUALLY MAKES MONEY • ANNUAL REVENUE, USD

The money is in **food** and **running**. No gym coach app has passed **\$50M**.

■ Nutrition
 ■ Running
 ■ Gym / strength

Fitness apps took **\$4.5B** in 2025, up 13%, while downloads grew **0.8%**

- the market pays more, not more people.

Sources Business of Apps (MyFitnessPal 2025) · Sacra (Strava 2024) · Yahoo Finance / BusinessWire (Ladder subs, Nov–Dec 2024) · Sensor Tower public teasers (Fitbod, Hevy monthly IAP, early 2026) · Die Deutsche Wirtschaft (Freeletics est.) · Sensor Tower, State of Mobile H&F 2025. "est." = analyst estimate, not company disclosure. Peloton (\$2.4B) omitted: hardware and classes.

WHY NOBODY LEADS THE AI-COACH CATEGORY YET

Four reasons the seat is still **empty**.

1 • "AI" IS A LABEL

"AI" is mostly a quiz and a template

Real adaptive engines exist. They are niche and silent: no dialogue, no food.

28% of fitness apps now bid on "AI" keywords, up from 19%. Sensor Tower, Feb 2026.

2 • SPLIT IN THREE

Nobody does all three

\$4 apps record. \$13–35 apps generate. \$199 apps put a person on the phone.

Reviewers call it "algorithmic vs human-first, no dominant leader".

3 • TRUST NOT YET EARNED

People do not believe an AI coach yet

So it must prove itself in week one, with a real plan, not a chat box.

Only 10% prefer AI guidance to a human coach. Les Mills 2026.

4 • RETENTION KILLS EVERYONE

Whoever survives six weeks wins

The category loses almost everyone. The winner keeps beginners.

Day-30 retention 3–4%. First renewal: monthly 57%, annual 25%. RevenueCat H&F, 2026.

**The proof it can be done: Runna**

One behaviour, plans that really re-adjust, \$19.99 a month. Strava bought it in April 2025. The gym version does not exist yet.

FEATURE BY FEATURE

Others **log or generate**. Heaft runs the whole loop.

Capability	Hevy Strong	Fitbod	Freeletics	TrackFull	Future	Heaft
Writes your program for you	—	✓	✓	—	H	✓
Next week changes from your logs	—	✓	~	—	H	✓
Runs the session live: sets, rest, cues	✓	✓	✓	✓	✓	✓
Coach chat that knows your data	—	—	~	~	H	✓
Food target follows today's training	—	—	~	~	—	✓
Swap an exercise, reason remembered	—	~	~	—	H	✓
Scan a coach's written plan	—	—	—	—	—	✓
Cycle-aware training and hydration	—	—	—	—	~	✓
Friends, crews, leaderboards	✓	—	✓	✓	—	✓
Price per month	free · \$4	\$15.99	\$11.66	\$6.99	\$199	\$9.99
✓ yes ~ partly — not offered H a person does it, not software						

Basis competitor rows from each company's own store listing and website, read Sep 2026; "not offered" means not claimed in their marketing. Partly: Freeletics re-plans weekly and sells nutrition as an add-on, TrackFull comments on what you logged rather than chatting. Heaft rows are shipped code in the repository.

WHAT ONE USER COSTS US • PER MONTH

A free user costs 13 cents.
A Pro user costs 43 cents.

FREE USER • TYPICAL MONTH

\$0.13 / month

12 workouts • 20 coach messages • 10 photos

Coach chat • 20 messages	\$0.035
Program + weekly updates	\$0.023
Session analysis + meal photos	\$0.032
Server share	\$0.039
Total	\$0.13

PRO USER • TYPICAL MONTH

\$0.43 / month

16 workouts • 150 coach messages • 60 photos

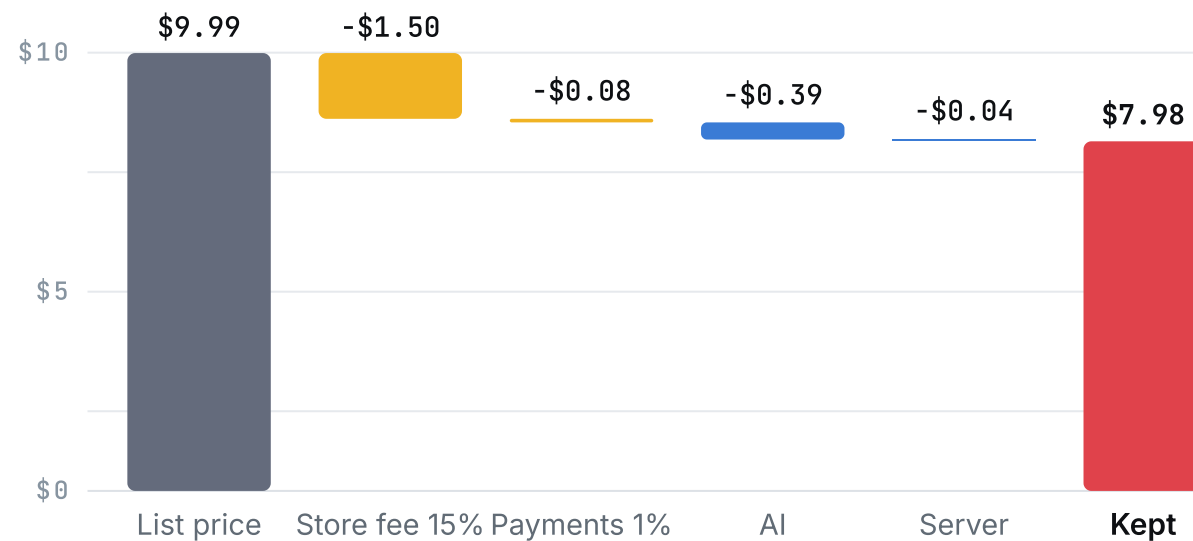

Coach chat • 150 messages	\$0.263
Programs, updates, weight tips	\$0.044
Sessions, plan scans, photos	\$0.083
Server share	\$0.039
Total	\$0.43

Worst case: a Pro who hits every daily quota costs **\$2.89** a month. Still far below the price.

Rates Cerebras gpt-oss-120b \$0.35 / \$0.75 per 1M tokens • Together Llama 3.3 70B \$1.04 • Gemini 2.5 Flash-Lite \$0.10 / \$0.40 • Gemini 2.5 Flash \$0.30 / \$2.50 (list prices, 15 Sep 2026). Token counts per call estimated from Heaft's prompt code. Server = DigitalOcean 4 GB droplet \$24 + backups + domain + store fees = \$39 / month fixed.

DOES ONE PRO SUBSCRIPTION PAY?

One monthly Pro keeps **\$7.98** and pays for **62 free users**.

● MONTHLY PLAN • \$9.99

80%

of the list price stays with us. One Pro pays for 62 free users. Break-even conversion: **1.6%** of users.

● ANNUAL PLAN • \$59.99 = \$5.00 / MO

76%

stays with us (\$3.78). One annual Pro pays for 29 free users. Break-even conversion: **3.3%**.

● FIXED COSTS • \$39 / MONTH

5 Pros

on the monthly plan (or 11 annual) cover the whole server, backups, domain and store fees.

Assumptions Apple Small Business Program and Google Play subscription fee 15% • RevenueCat 1% above \$2.5k monthly revenue • typical Pro AI use \$0.39 • server share at 1,000 users. A Pro who maxes every quota (\$2.89 AI) still leaves \$5.51 on the monthly plan.

WHAT THE BUSINESS LOOKS LIKE AT SCALE • PER MONTH

At the category's median conversion, Heaft is profitable from **1,000 users.**

USERS	PAYING (2.9%)	REVENUE KEPT	AI COST, FREE USERS	AI COST, PRO USERS	SERVERS	PROFIT	MARGIN
1,000 Barcelona pilot	29	\$205	\$87	\$11	\$39	\$67	33%
10,000 Spain, year 1-2	290	\$2,048	\$874	\$113	\$63	\$999	49%
100,000 Spain + first EU markets	2,900	\$20,482	\$8,739	\$1,125	\$400	\$10,217	50%
100,000 at top-quartile conversion, 6.2%	6,200	\$43,788	\$8,442	\$2,406	\$400	\$32,541	74%

The biggest cost line is the AI we give away to free users, not the Pros. Blended break-even conversion is **1.3%** . The lever is the freemium boundary: which coach features stay free.

Assumptions revenue kept = list price minus 15% store fee and 1% payments; 68% of subscribers monthly, 32% annual (RevenueCat H&F mix) → \$7.06 kept per Pro • free user AI \$0.09, Pro AI \$0.39 • servers: 4 GB droplet \$39 → 8 GB \$63 → larger box + managed Postgres ≈ \$400. No marketing or salaries included. Team costs are the real next question.

THE FIRST THREE USERS • BARCELONA, SEPTEMBER 2026

The desk research ends here. We stood next to **three people** while they used it.

USER 1 • DAY ONE

He did not know the words

Our intro asks for experience, activity level and goal. His honest answer to all three: "I don't know, I just got here."

We wrote onboarding for people who already train.

Change: an intro a beginner can finish.

USER 2 • THE SCREEN

Our colour reads as an error

He said the screen felt overwhelming, and that the red looked like a warning. It is a collision we built ourselves.

In a gym red is the 25 kg plate. On a screen it means something broke.

Change: colour with a job.

USER 3 • THE CYCLE TRACKER

She missed two days

She went to the part built for her, forgot to log for two days, and found the app **only accepts today**.

A gap that can never be filled makes every prediction after it wrong.

Change: log the days you missed.

None of this came from a survey. $n = 3$

• first users, not a sample • every finding is a fault in our own product.

Basis three first users in Barcelona, September 2026. Findings 1 and 2 were watched in person, finding 3 was reported by the user. Three people cannot measure a market and nothing here is extrapolated. They test one thing: whether the segment on slide 02 is the segment that turns up.

HOW WE BECOME THE FIRST FULL COACH

Nobody owns "the coach" yet. The seat is **open**, and the maths says we can afford to sit in it.

BET 1 • PRODUCT

Lead with the programme, not the log

A new user sees a generated week before logging anything. Nutrition follows the day. Next week gets harder on its own.

BET 2 • PRICE

Coach depth at logger prices

\$9.99 a month sits between the loggers (\$4) and the AI generators (\$13), and 20× under a human coach app (\$199). Each Pro still keeps 80%.

BET 3 • SEGMENT

Win beginners in their first 6 months

The half who quit by month six are the people no logger serves. Barcelona students first, 15 interviews, then the numbers decide.

Built, not finished. The market is real and the margin is real. The first three users showed us exactly where the product still fails a beginner. That is the next three weeks.
